

DO YOU LIVE IN THIS CIRCLE?

**YOU HAVE SPECIAL RESPONSIBILITIES
AS THE OWNER OF A DRONE.**

Drones are not toys. Officially, they are Unmanned Aircraft Systems (UAS), and if they're .55 lbs. or heavier, they must be registered with the FAA.

- 1.** No drone may fly within 5 miles of an airport without notifying the airport operator and air traffic control tower.
- 2.** Never forget that your drone can be dangerous to the rest of aviation. Reckless use could result in fines.
- 3.** Your registration number must be visible on your drone.
- 4.** Fly below 400 feet and keep the aircraft within your line of sight at all times.
- 5.** Registration costs \$5 and is valid for 3 years.

Find more information at www.faa.gov/uas and www.knowbeforeyoufly.org.
