Electrician

\$48,568.00 - \$75,254.40 Annually

Excellent Benefits Package

The Department of Aviation seeks an experienced professional who will perform journey level installation, repair, maintenance and remodeling of electrical and electronic equipment and facilities and street lighting systems on a variety of County locations; ensures that electrical power is available for facilities on an emergency basis. Requires an equivalent to graduation from high school and six years of full-time skilled experience in the electrical trade. Successful completion of a recognized apprenticeship as an electrician may be substituted for four years of the required experience. Attendance at a recognized trade school is desirable, as is experience with electronic controls and experience in an industrial or plant setting.
